

Test plan

Our plan is to ask the volunteer who is testing ours to try to first create an account by clicking the signup button and filling out the information. Secondly, try to log into the account you created by filling out the username and password entered previously. Thirdly, try your health information, account information, and calendar by using the symbols located at the bottom. Fourthly, pick a workout and get more information about it by going to a workout and hitting the I in the top right. Finally, get them to start the workout they picked by hitting the back button then hitting the start button.

Feedback

- Some of the bottom buttons where confusing
- Hard to get from home to the workouts
- Alot of information
- 2 accessibility buttons

Changes

- Changed buttons of button to be less confusing
- Added easy to see buttons to buttons to get from home to the workouts to allow easier movment throughout the app
- Removed one accessibility button to make it less convoluted
- Simplified information and made it easier to find what it's for
